

**IN THE CLAIMS:**

**Claims 4-6, 12-13, 24-29, 79-87, 95-96 and 101-104 remain cancelled.**

**Claims 32-78 were previously withdrawn following a restriction requirement.**

**Please amend the claims as indicated below:**

1. (Currently amended) A method of brokering data between handheld wireless devices and publicly available data rendering devices, comprising:

selecting data from a handheld wireless device (WD) for rendering at a publicly available data rendering device (DRD), said DRD further comprising at least one of [an] a video monitor, an Internet Kiosk, a multimedia projector, or an ATM machine, and said DRD having a location not yet known by the WD;

providing a request to locate at least one DRD from said WD to a network resource including a public wireless network communications hardware and an associated public wireless communications network adapted for supporting wireless hand held devices, wherein said request is for said network resource to locate at least one DRD including a requirement that location be in accordance with a combination of said WD's geographic location and a WD user profile associated with said WD;

said network resource locating at least one DRD located near said WD and matching said WD user profile;

said network resource identifying to said WD at least one DRD located near said WD and matching said WD user profile to said WD in response to said request and

selecting a DRD with said WD; and

transferring said data from at least one of said WD and said network resource to said DRD for rendering from memory associated with the WD.

2.(Previously amended) The method of claim 1 including a step wherein said DRD renders the data only after a render command is provided to said DRD through said WD.

3. (Original) The method of claim 2 wherein said render command includes a passcode.

4. (Canceled).

5. (Canceled).

6. (Canceled).

7. (Previously amended) The method of claim 1 wherein the data is rendered by said DRD after said render command is provided by a WD user on a user interface associated with said DRD.

8. (Previously amended) The method of claim 1 wherein the data is retrieved from a memory assigned to the WD user only after the WD user provides a passcode to said DRD.

9. (Previously amended) The method of claim 8 wherein said passcode is provided to said DRD by the WD.

10. (Previously amended) The method of claim 8 wherein said passcode is provided at a user interface associated with said DRD.

11. (Previously amended) The method of claim 8 wherein said command includes decryption coding.

12. (Canceled).

13. (Canceled).

14. (Previously amended) The method of claim 1 including a step wherein said network resource provides the WD with a passcode for use on an interface integrated with said DRD to cause said DRD to render the data.

15. (Currently amended) A method of brokering data between a wireless device (WD), said WD supported by public wireless communications network resources including public wireless network communications hardware and associated communications networks, and a publicly accessible data rendering device (DRD), said DRD further comprising at least one of [an] a video monitor, an Internet Kiosk, a multimedia projector, or an ATM machine, wherein said DRD is not assigned to the WD and is publicly accessible to WD users, wherein a WD user performs the following steps at said WD:

- selecting data with said WD to render at a DRD;

- entering a DRD locator request with said WD to said public wireless communications network resources to find at least one DRD located near the WD, said locator request including WD location information;

- receiving DRD location information at said WD for the at least one DRD located near the WD, wherein said DRD's location information is based on said WD location information;

- selecting a DRD with said WD for rendering said data; and

- requesting at said WD that said data be transferred to said DRD through said public wireless communications network resources.

16. (Previously amended) The method of claim 15 wherein said data is transferred to said DRD from said public wireless communications network resources following the request at said WD.

17. (Previously amended) The method of claim 16 wherein said public wireless communications network resources facilitates transfer of said data to said DRD from a memory associated with said WD.

18. (Previously amended) The method of claim 17 wherein said step of requesting that said data be transferred to said DRD is followed by a step that includes entering a passcode by the WD user at said DRD to render the data.

19. (Previously amended) The method of claim 16 wherein said data is retrieved from a mailbox assigned to said WD only after a passcode is provided to said DRD by said WD user.

20. (Original) The method of claim 19 wherein said passcode is provided to said DRD by said WD.

21. (Original) The method of claim 19 wherein said passcode is provided at a user interface associated with said DRD.

22. (Previously amended) The method of claim 15 wherein said DRD renders data after a render command is provided to said DRD by said WD user.

23. (Original) The method of claim 22 wherein said render command includes a passcode.

24. (Canceled).

25. (Canceled).

26. (Canceled).

27. (Canceled).

28. (Canceled).

29. (Canceled).

30.(Currently amended) A method of brokering data between wireless devices and publicly accessible data rendering devices, comprising enabling a user of a wireless device to perform the following steps:

using a wireless device (WD) to request support from public wireless network communications hardware and an associated public wireless communications network adapted for supporting said WD to locate at least one publicly accessible data rendering device (DRD) further comprising at least one of [an] a video monitor, an Internet Kiosk, a multimedia projector, or an ATM machine, said DRD not previously being assigned to said WD and being physically accessible to a WD user of said WD, said locating executed by said public wireless network communications hardware and associated public wireless communications network in accordance with a WD user profile located in at least one of said WD, said public wireless network communications hardware and associated public wireless communications network and based on the geographic location of said WD;

receiving DRD location information at the WD for the at least one DRD located near the WD;

selecting a DRD with said WD for rendering data;

selecting data with said WD for rendering at the DRD; and

providing said data, at the request of said WD via said public wireless network communications hardware and associated public wireless communications network supporting said WD, to said DRD for rendering.

31. (Previously amended) The invention of claim 30, wherein said DRD renders said data after a render command is provided at said DRD by the user associated with said WD.

Claims 32-78 (Previously Withdrawn)

79. (Canceled).

80. (Canceled).

81. (Canceled).

82. (Canceled).

83. (Canceled).

84. (Canceled)

85. (Canceled).

86. (Canceled).

87. (Canceled).

88. (Previously added) The method of claim 31 wherein said rendering command includes decryption coding.

89. (Previously amended) The method of claim 30 further comprising the steps of:

receiving at a network server a request associated with said WD for delivery of said data for rendering at said DRD;

determining if delivery of said data can be approved by at least one of said network and/or said DRD; and

if delivery is approved, said server processes the request including facilitating delivery of said data to said DRD.

90. (Previously amended) The method of claim 89 further comprising the steps of receiving said data from said server at said DRD.

91. (Previously amended) The method of claim 90 wherein said data is received at said DRD via a network supporting said DRD.

92.( Previously amended) The method of claim 90 further comprising the step of rendering said data at said DRD following a rendering command received at said DRD by said WD.

93. (Previously added) The method of claim 92 wherein said rendering command includes a passcode.

94. (Previously added) The method of claim 92 wherein said rendering command includes decryption coding.

95. (Cancelled).

96. (Cancelled).

97. (Previously amended) The method of claim 1 wherein said rendering command includes decryption coding.

98. (Previously amended) The method of claim 1 wherein said commands enable WD user manipulation of said data during rendering of said data at said DRD using said WD.

99. (Previously added) The method of claim 98 wherein said DRD is at least one of: a presentation projector, a video display, and a photocopier.

100.(Currently amended) A method using public wireless network communications hardware and an associated public wireless communications network adapted for supporting wireless hand held device users in brokering data between handheld wireless devices and publicly available data rendering devices, steps of the method carried out by a hand held wireless device user comprising:

providing a request to a network resource to locate a publicly available data rendering device (DRD) further comprising at least one of [an] a video monitor, an Internet Kiosk, a multimedia projector, or an ATM machine, said DRD for rendering the data, said request provided through a hand held wireless device (WD) and a public wireless communications network supporting wireless communication by said WD to a network resource adapted for providing assistance to hand held wireless devices in locating DRDs by determining the WD's geographic location, locating at least one DRD located near said WD based on its geographic location and identifying at least one DRD to said WD;

receiving location information at said WD from the network resource through said public wireless communications network supporting wireless communication by said WD, said location information identifying at least one DRD located near the WD's geographic location as determined by the network resource;

selecting one DRD using said WD;

selecting data for rendering at said DRD using said WD; and

transferring said data using said WD to said DRD for rendering.

101. (Cancelled)

102. (Cancelled).

103. (Cancelled).

104. (Cancelled).

105. (Previously amended) The method of claim 100 wherein said commands enable the WD user to manipulate said data during its rendering at said DRD using said WD.

106. (Previously amended) A location based service method using public wireless communications network resources to assist a user of a GPS-enabled

hand held wireless device supported by the public wireless communications network to locate a publicly accessible data rendering device (DRD) comprising at least one of a video monitor, an Internet Kiosk, a multimedia projector, or an ATM machine, the method comprising the steps of:

- receiving a request from a GPS-enabled hand held wireless device at a public wireless communications network resource for assistance in locating a publicly accessible DRD;

- said public wireless communications network resource determining the GPS-enabled hand held wireless device's geographic location using GPS information provided from the GPS-enabled hand held wireless device;

- said public wireless communications network resource using the GPS-enabled hand held wireless device's geographic location to locate at least one publicly accessible DRD located near the GPS-enabled hand held wireless device; and

- said public wireless communications network resource identifying the at least one publicly accessible DRD including its geographic and physical location to the GPS-enabled hand held wireless device.

107. (Previously amended) The method of claim 106 further comprising the steps of:

- receiving a request at a network server from said GPS-enabled hand held wireless device to retrieve data stored in memory associated with said GPS-enabled wireless hand held device and to transfer said data to the at least one publicly accessible DRD identified by the network resource; and

- said network server transferring said data to said at least one publicly accessible DRD in response to the request.

108. (Previously amended) The method of claim 107 further comprising the step of said at least one publicly accessible printer receiving said data from said network server.

109. (Previously amended) The method of claim 108 further comprising the step of said at least one publicly accessible DRD rendering said data it received from the network server after further receiving a passcode entered by the user of the wireless hand held device directly onto a user interface associated with the at least one publicly available DRD.

110. (Previously amended) The method of claim 108 further comprising the step of said at least one publicly accessible DRD rendering said data it received from the network server after further receiving an infrared authorization signal from the wireless hand held device.

111. (Previously amended) The method of claim 108 further comprising the step of said at least one publicly accessible DRD rendering said data it received from the network server after further receiving a wireless authorization signal provided locally from the wireless hand held device.

112. (Previously amended) The method of claim 106 further comprising the steps of:

a user of said GPS-enabled hand held wireless device physically locating said publicly accessible DRD;

the user of said GPS-enabled hand held wireless device transmitting a request to a network server from said GPS-enabled hand held wireless device to retrieve data stored in memory associated with said GPS-enabled wireless hand held device and to transfer said data to said publicly accessible DRD; and

said network server transferring said data to said publicly accessible DRD in response to the request.

113. (Previously amended) The method of claim 112 further comprising the step of said publicly accessible DRD receiving said\_data from said network server.

114. (Previously amended) The method of claim 113 further comprising the step of said publicly accessible DRD rendering said\_data it received from the network server after further receiving a passcode entered by the user of said wireless hand held device directly onto a user interface associated with said publicly accessible DRD.

115. (Previously amended) The method of claim 113 further comprising the step of said publicly accessible DRD rendering said data it received from the network server after further receiving an infrared authorization signal from said wireless hand held device.

116. (Previously amended) The method of claim 113 further comprising the step of said publicly accessible DRD rendering said data it received from said network server after further receiving a wireless authorization signal provided locally from said wireless hand held device.

117. (Previously amended) The method of claim 106 further comprising the steps of:

- a user of a hand held wireless device physically locating a publicly accessible DRD;

- the user of said hand held wireless device wirelessly transmitting data from said hand held wireless device to said publicly accessible DRD

- said publicly accessible DRD receiving said data from said hand held wireless device; and

- said publicly accessible DRD rendering said data.
